# Platform Feature: Assessments Module

Secure your ecosystem with serious security.

KEY FEATURES & FUNCTIONALITY

- **Create and conduct security assessments within the platform**, or send to external organizations such as vendors, partners or suppliers

- **Send assessments to organizations with the Ostendio Trust Network** or send invitations to your third parties and vendors to join the Trust Network

- **Send assessments to your auditor using the Auditor Connect marketplace** to conduct formal industry audits

- **Easily review questions** after they've been marked completed and locked

- **Create assessments from 150+ industry templates**, import custom assessments or manually create them

- **All assessments include** question text and instructions, standard custom answer types, question weightings, answer scoring and help text and links to supporting security information

- **Your assessment respondents can easily provide answers**, upload evidence and link to artifacts in their Ostendio platform, ensuring information and data is up-to-date
