

PURPOSEFUL INTEGRATION

Why Every Integration Must Have a Business Goal

Integrations should provide purpose

Integrations should be actionable, beyond providing a dynamic screenshot. Surface-level integrations will not save you or your auditor time. However, purposeful integration lets you align your current compliance status with business goals.

Critical questions you must answer to drive purpose

What are the use cases for your automation? What are you trying to achieve?

Your auditor will want to know **the actions taken behind the checkmark.**

If you're not compliant, **what actions will you need to take** beyond collecting evidence? Who needs to take action, and what needs to be resolved?

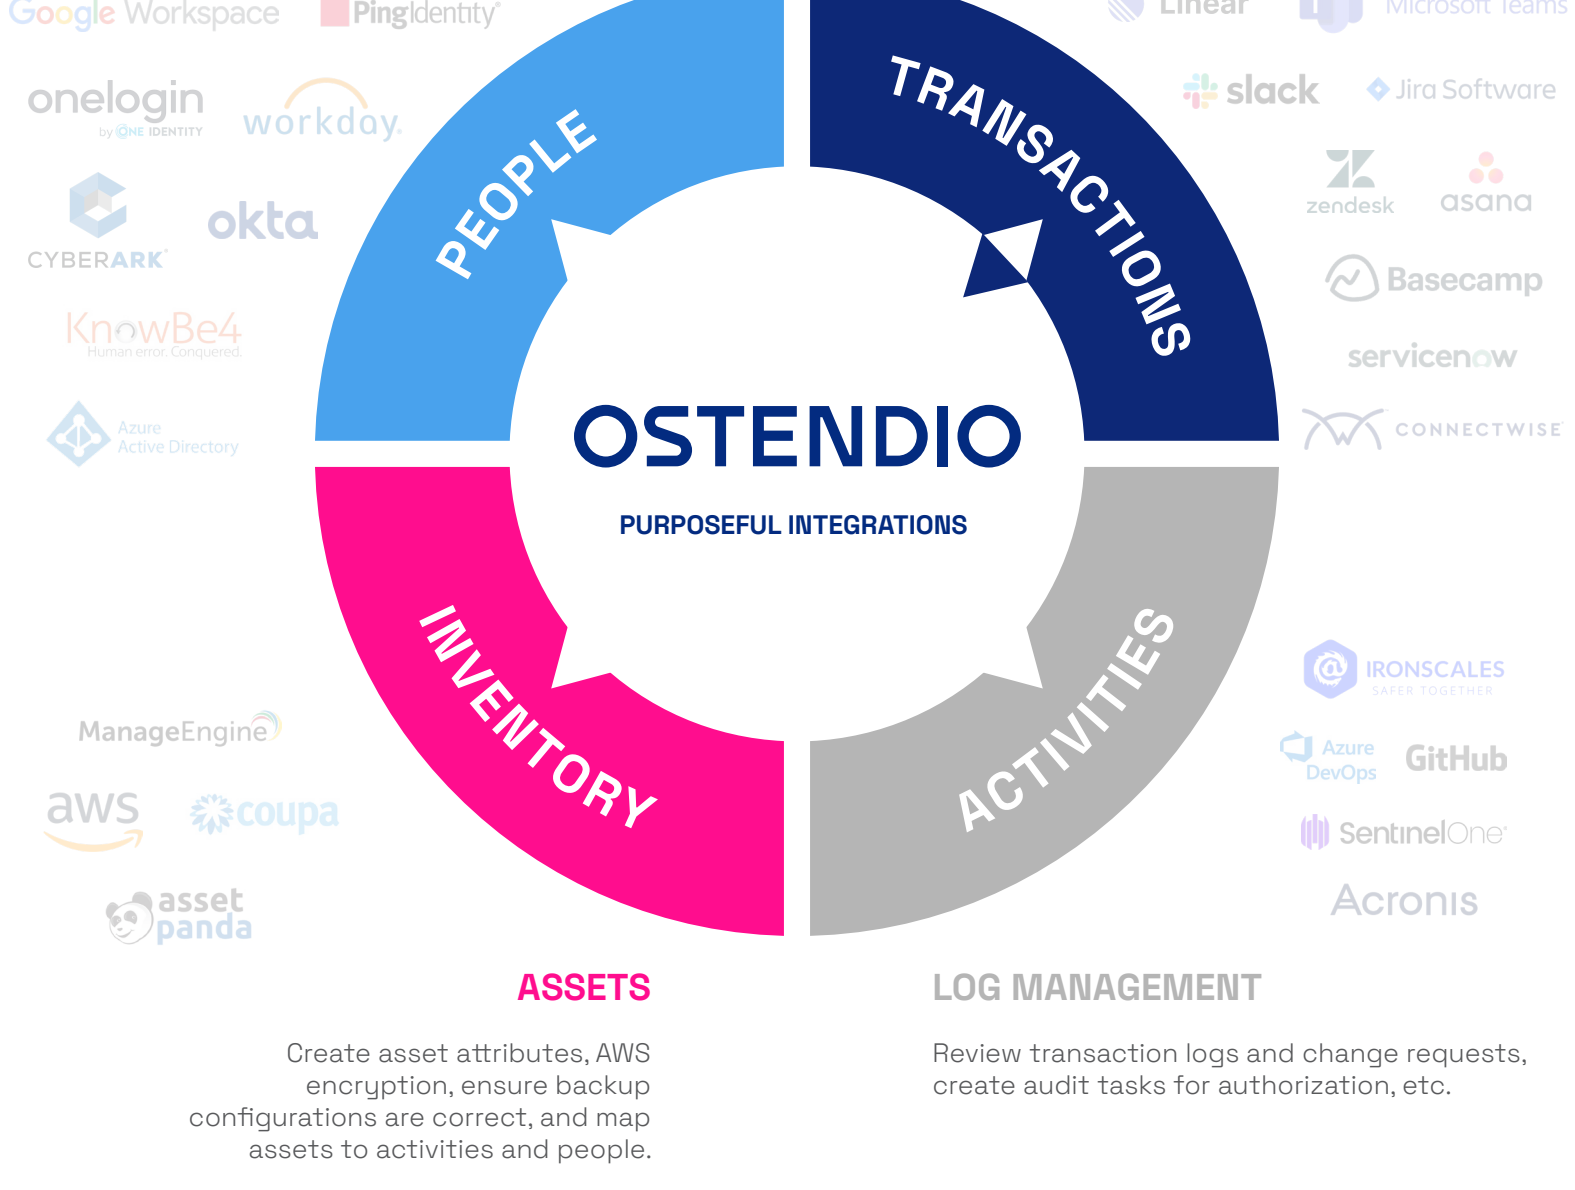

How Ostendio Integrations Drive Business Goals

USER MANAGEMENT

Manage user access across programs, assets, and activities.

TICKETING & COMMUNICATION

Assign and track tickets, monitor background checks, assign document tasks, etc.

How Purposeful Integrations Go Beyond Static Screenshots to Help You Take Action with Purpose

ELIMINATE REDUNDANT TASKS

Integrating all of your systems in one location eliminates the need to repeat tasks, allowing you to get more done with your time.

REDUCE EVIDENCE COLLECTION

Save time collecting evidence by eliminating back and forth system checks and having all your evidence in one place.

ACCELERATE COMPLIANCE TIMELINES

With your evidence readily on hand, you can easily prepare and present evidence to your auditor for your next audit.

TWO-WAY TICKET SYNCHRONIZATION

Sync tickets bi-directional have the same information in real-time.

ANALYZE RICHER DATA

Pull in detailed data and make more informed decisions about your risk management.

GET BETTER DATA CONTEXT

Understand deeper context and easily adjust questions and data as your program matures.
